ITS 1114- Advanced API Development_ Final Project Proposal Submission

Overview

Hierly is a modern freelance service platform designed to connect skilled freelancers with potential clients in a fast, reliable, and user-friendly environment. The platform aims to empower local and global freelancers to showcase their talents, take on client projects, and receive secure payments. Inspired by platforms like Fiverr and Upwork, Hierly will offer a simplified interface targeted at small businesses, startups, and individual freelancers in Sri Lanka and beyond.

Problem Statement

Many skilled individuals in Sri Lanka lack a digital platform to promote their freelance services. Existing platforms like Fiverr, Freelancer are competitive and international-focused, making it difficult for local talents to gain visibility. On the client side, it's hard to find trustworthy, skilled freelancers for local, short-term jobs. This gap in the market limits opportunities and discourages digital freelancing careers.

Objectives

- **Primary Objectives**
  - Create a user-friendly freelance platform for both clients and freelancers.
  - Provide functionalities like job posting, service buying, secure messaging, and reviews.
  - Ensure secure login and real-time notifications.
- **Secondary Objectives**
  - Build an admin dashboard to manage users, jobs, and reports.
  - Enable freelancers to manage portfolios, services, and earnings.
  - Provide search and filter options to improve user experience.

ER Diagram (Summary)

Entities include:

- User (Client/Freelancer) – id, name, email, role, etc.
- Service – id, title, description, price, freelancerId
- Order – id, clientId, serviceId, status, date
- Message – id, senderId, receiverId, content, time
- Review – id, orderId, rating, comment
- Admin – id, name, role

Conclusion

Hierly aims to become a powerful local freelance platform, promoting talent, reducing unemployment, and fostering a digital economy. The system will be scalable, secure, and easy to use for all users, from tech experts to first-time freelancers.
